The Licensed Electrician Needed...

As we took our review and rethinking of the Solar market on Puerto Rico, we learned much about safety AND the Government!

Regulations, laws, and logistics had the entire Solar and Battery Market tied to Large Solar Companies connected to the Government.

We follow the rules and our design turns out to be easier, less complicated, and cheaper for everyone!

Our model is simple – replace a generator for home survival in the reality of LUMA service. Not to mention a natural disaster.

We start with a specific off-grid Inverter and connect it to an LFP Battery. This connects directly to the breaker box in any home or condo.

- ✓ No need for a transfer switch as with a generator
- ✓ Direct connect from Meter
- ✓ Direct Connect to Breaker Panel
  - Critical loads only if wanted
  - Entire house/condo if wanted
- ✓ ALL items UL Certified and Listed
- ✓ Considered 'Off-Grid' Installation
- ✓ Needs 1/3 the Solar Panels, 1/3 the Generator output, and can even charge off an outlet

OUR NEED...

- ✓ Licensed Electricians to connect the Inverter and Battery to a home or condo breaker panel
- ✓ IF wanted/needed, we have solar panels for Temp Install to Custom mounting on railings, Awnings, and 250MPH Rated mounting systems for roof and ground
- ✓ Island Wide Installations with MANY in Condos

HIGH PAY for each installation and commissions for sales from Electricians!
